

Cisco TelePresence

Meet more efficiently, reduce costs and collaborate like never before with a revolutionary video conferencing technology.

Cisco TelePresence allows for intimate person-to-person connection without the need to travel to the meeting location. Host customer engagements, company meetings, training sessions and supplier reviews with secure end-to-end connections with proven service providers.

As an IT business owner you can embrace the power of Cisco TelePresence by connecting with:

- Intra-company offices
- Remote users
- Customers
- Suppliers
- Ingram Micro Sales and Technical Support
- Cisco field offices
- Public Cisco TelePresence suites

Through a powerful combination of technologies that allows for remote participants to feel as if they are right in the same room, Cisco TelePresence conference solutions can significantly enhance your productivity and transform your business.

- Gain speed to market
- Solidify your competitive advantage
- Achieve greater customer intimacy
- Scale scarce resources
- Reduce travel costs
- Collaborate like never before
