

HP rp3000 MAKES CASUAL DINING UPSCALE.

HP rp3000 Point of Sale

Order Up the Best Customer Experience with
HP's rp3000 Point of Sale Solution

The HP rp3000 Point of Sale Solution combines everything restaurant owners need to compete in today's competitive hospitality marketplace

Technology powers the business, differentiates the customer experience and increasingly determines which restaurant owners are successful. In order to keep your restaurant business going – and growing – you need a reliable system that works for you day in and day out. The road to success has been mapped out for your business with the restaurant-ready HP rp3000 Point of Sale (POS) Solution. A true POS system, the rp3000 is designed to meet the challenges of your restaurant's environment with components not found on a PC or a standard cash register. The HP rp3000 includes a powerful processing system, a durable form factor, and a three-year standard warranty as well as a comprehensive array of HP peripherals – from touch screen monitor to POS keyboard with magnetic stripe reader to thermal receipt printers. Buy what you need, and as your business grows, you can easily purchase more systems to add additional server stations or to expand your business to new locations. The HP rp3000 gives you the freedom to customize a solution to fit the specific needs of your restaurant operations.

Draw patrons in and HP will help you stand out

Combining the HP rp3000 with market-specific software applications from HP's many trusted foodservice software partners, will help you seamlessly run your business from the hostess stand through to the kitchen. Advertise your restaurant's special events and market to your existing customer base with drill down access to their visits and dining habits. Save time and improve operations with order management tools that keep you informed around what's selling and what's not. Keep your kitchen in tune with your dining floor with a platform that can handle integrated foodservice and accounting software. And increase table turn efficiency with electronic bill processing that ensures each table and each customer is checked out quickly and billed accurately every time. Restaurant POS technology from HP gives restaurateurs the tools to drive better business outcomes through improved operations, better image and increased customer satisfaction.

HP POS helps you tailor your day to day operations to fit your patrons and your establishment

You've got what your customers need, but you also need to be able to serve it to them in a way that is fast, convenient and easy for the both of you.

Feeding your restaurant's success is about more than just feeding your patrons

You have to be able to effectively manage your staff, suppliers and competition, while providing the best dining experience possible.

- **Flexibility:** Modular by design, you can choose the system, software and peripherals that are right for your business, preparing you to work with more ease and efficiency.
- **Reliability:** HP POS systems are simple to set up, easy to use and because of the standard three year limited warranty on full hardware bundles for end-to-end service in one phone call, maintenance is worry-free.
- **Adaptability:** A wide range of applications can help you adapt and evolve with the changing market while giving your customers what they deserve—efficient and responsive service.
- **Efficiency:** More easily manage everything—from inventory and back office operations, to your employees' timesheets. With all these tasks taken care of, you can focus on your customers and keep the line moving.
