Ingram Micro | Data Capture/POS Division

One Source. Complete Solutions.

Ingram Micro is the first distributor to bring you a single source for AIDC, POS and all the complementary technologies you need to build your technology business and win a competitive advantage.

Large and Broad Inventory | We maintain one of the deepest and broadest inventories in the AIDC/POS market, which allows us to provide higher fill rates and faster response times for you. Combine that with access to Ingram Micro's leading broadline inventory, and we offer the only one-stop complete solution source in the industry.

Industry-leading Web Site and Electronic Connectivity | Our industry-leading web resources work when and how you work. With libraries of information, quote and purchasing histories, access to both data capture/POS and traditional Ingram Micro product lines, and advanced tools for complete product purchasing selection, our new web site puts powerful business tools right at your fingertips.

Later Shipping Times | Our state-of-the-art distribution centers can process your orders faster and with more efficiency than anyone else. Cutoff time for product orders is 9 p.m. Eastern, 8 p.m. Central and 6 p.m. Pacific.

Optimized Order Management and Freight Services | We have stocking locations on both coasts, allowing you to get critical products and services to your customers faster and more efficiently. Also, take advantage of our personal delivery options, and custom product kitting and configuration.

More Credit and Financing Options | Our field credit representatives work with our customers to increase credit lines and suggest a comprehensive suite of financing solutions, such as product flooring, PO financing and leasing.

More Field Sales Support | Our sales force includes both an inside team to handle your transactions and a field team to help you grow your business. All team members are highly trained AIDC/POS specialists who will complement your own staff's skills. Also, our customer service and tech

support teams provide the unsurpassed support for which Ingram Micro is known.

Partnering, Professional Services and Lead Generation | With our new Practice Group of prequalified RFID, AIDC and POS experts, you'll be able to extend your geographic reach and technical capabilities, and take advantage of new lead opportunities in growing vertical markets — even if you are new to those markets.

RFID and Vertical Market Programs | We want to help you capture the new business advances associated with RFID technology, as well as learn more about such vertical markets as government and healthcare. That's why we offer training and marketing programs to support your growth in new technologies and markets.

Demo Program | Ingram Micro's Data Capture/POS Division has an extensive pool of demo stock that is available for loan to qualified resellers. This very successful program allows you to evaluate data capture/POS products and demonstrate them to your customers.

Personalized Delivery | This free program allows you to customize the information on your packing slips, making it valuable for orders that are shipped directly from Ingram Micro to your customers. We can add your logo, your name and address, end-user PO and many other custom elements.

Our goal is to provide you with the highest-value distribution services, more financial resources, the ease of one-stop shopping and the best customer experience in the industry. To find out more about what we can offer you today and in the future, please contact your data capture/POS representative.
