

SecurePOS SMB Bundle

An Industry First in Cyber Thief Protection

We've gathered all the best components into one secure SMB solution to ensure your customer's data is always secure. Take a look around, and you'll see that securing cardholder data is at the top of everyone's mind. We've got you covered.

CHERRY

Cherry keyboards

The foundation of this solution is the HP rp3000 Point of Sale System, plus:

CITIZEN
Micro HumanTech

Citizen printers

- MagTek MagneSafe readers, which enable end-to-end encryption of cardholder data beginning at the card reader

hp

HP rp3000 systems

- Payment Processing Inc. (PPI) credit card processing
- Uniforce retail and restaurant software

MAGTEK

MagTek MagneSafe card readers

- Cherry keyboards
- Citizen receipt and kitchen printers
- Planar monitors (touch and non-touch)

MMF
The Heart of POS

MMF cash drawers

- MMF cash drawers

- Additional optional peripherals

Now you've got a complete, out-of-the-box, secure retail and restaurant solution that maximizes your customer's counter space and keeps business data safe.

MOTOROLA

Motorola scanners

System Component Details

HP rp3000 Point of Sale System

- HP rp3000, featuring an open, industry-standard architecture
- Intel Atom 230 processors that require less energy, which means the system lasts longer and lowers energy costs
- Genuine Windows Vista Business, with the optional downgrade to Windows XP Professional custom-installed or FreeDOS
- Retail-hardened design featuring an extensively tested steel chassis for long-term retail wear and tear at an affordable price
- Six USB 2.0 ports, two powered USB ports and two power-configurable ports, with more available on select models

Cherry Keyboards

These multifunctional, compact USB keyboards with enhanced key layouts and optional magnetic card readers and touch pads are retail-focused and ready to go.

Citizen Printers

- High-speed, 150-mm/sec printing
- Dual-interface standard on all units (USB plus serial, parallel or Ethernet)
- Smallest footprint in its class, and wall-mount options make it even smaller

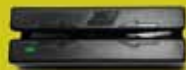

Planar Monitors

- 15-inch size with SXGA resolution
- Economical five-wire resistive touchscreen
- Recognizes touch input from a finger, gloved hand, credit card, pen or stylus
- Dual serial/USB touchscreen interface
- Solid, stable base with -5° to 90° tilt range
- Three-year Customer First Warranty featuring free two-day advance replacement

MagTek Readers

The MagTek MagneSafe Mini is a multi-track reader in a 100-mm body that offers all the MagneSafe security features, including data encryption and MagnePrint, plus device and host authentication. It keeps your customers' information safe from the point of swipe.

MMF Cash Drawers

MMF VAL-u Line series cash drawers offer affordable versatility for SMB retail applications.

Motorola Scanners

When your customers need to add affordable scanning performance to existing systems, recommend the LS2208. This small, lightweight scanner will help increase productivity at the retail point of sale and in the stockroom, allow efficient medication management and inventory control in medical facilities, and help track assets and inventory.

Whatever the application may be, the LS2208 offers a durable design to reduce downtime and keep maintenance costs to a minimum.

- Increased productivity, lower TCO
- High-performance scanning
- Durable future-proof construction

PPI — Payment Processing Inc.

A single resource for all your payment-processing needs, PPI includes:

- Superior payment-processing technology
- 24/7/365 technical support for payment processing
- Reseller deals that are more attractive than bank merchant rates

Uniforce Retail/Restaurant-LITE Software

This is technology designed specifically for the solo retail or restaurant store. It helps manage business more efficiently, cost-effectively and with easy-to-use features that make training employees easy.

It's the new POS standard for small and midsize retail/restaurant and wholesale businesses.
