

Upgrade to InventoryControl v6

Introducing InventoryControl v6 – the next generation in inventory tracking software, from Wasp Barcode Technologies. InventoryControl v6 replaces InventoryControl v5 or previous releases.

Why Upgrade?

InventoryControl v6 Standard

New features in Wasp InventoryControl v6 Standard include:

■ **Store Images and Files:** Attach an image or file to an inventory record for easy access to important information

■ **Track Inventory Costs:** Track inventory cost more accurately using LIFO, FIFO, or Moving Average methods

■ **Unlimited Imports:** Import an unlimited number of inventory items from an external source for quick and easy implementation

InventoryControl RF Professional and RF Enterprise

InventoryControl RF Professional and RF Enterprise include the new features available in InventoryControl Standard, PLUS:

■ **RF (Wireless) Data Transfer!** Get real-time access to view and update inventory records, locations, and more, from anywhere within your organization's 802.11 b/g/n wireless network.
