HOSTED MICROSOFT EXCHANGE SERVER

Help your customers gain the benefits of Microsoft Exchange for a small monthly fee. With Ingram Micro Seismic Hosted Microsoft Exchange Server 2003 and 2007, you can offer all the features and functionality of the popular application as a 100-percent private-label software-as-a-service (SaaS) solution. This easy-to-use service offers an intuitive collaboration capability for improved productivity with anywhere, anytime access.

Exchange Hosting Solutions

Because all mailbox data, including contacts and calendar, is stored centrally on the Exchange Server, users can connect via a variety of devices to view their entire mailbox and seamlessly synchronize across platforms and devices. For example, users typically use Microsoft Outlook while in the office, a BlackBerry or Treo handheld while on the road, and Outlook Web Access from their homes, all without ever having to worry about synchronization of any e-mails, contacts or appointments.

The Complete Package

Seismic Hosted Microsoft Exchange Server is an element of the Seismic Hosted Exchange/SharePoint/CRM launch package. As a complementary service to Seismic Hosted Windows SharePoint Services and Seismic Hosted Microsoft Dynamics CRM 4.0, it can be used alone or with the Seismic suite of hosted Microsoft services.

Private Label

Seismic hosted SaaS enables you to offer hosted Microsoft Exchange features without incurring any upfront expenses. As a private-label service, it's branded with your own company name, logo, URL and corporate look and feel, allowing you to maintain ownership of your customer relationships.

It Just Makes Sense

Rather than investing hundreds of thousands of dollars to host Microsoft Exchange for your customers, why not let Seismic Hosted Microsoft Exchange do the heavy lifting for you? Our private-label hosted service lets you own the customer

relationship, sell additional services and negotiate rates based on whatever the market will bear — all without the large capital expense required for hardware and software resources, or the need for more staff to implement, manage and maintain.

Features:

- Set up in just 30 minutes; start selling immediately
- Live 24/7 chat, phone and e-mail tech support — all based in the United States
- 99.9-percent uptime SLA on shared servers and 100-percent uptime SLA on dedicated servers
- Support for mobile devices like the BlackBerry, Treo, PocketPC, smartphone and Windows Mobile handhelds
- Free Outlook 2007 or Entourage 2004 for each user
- Daily backups
- Customers up and running immediately
- No large capital outlay for your customers

Control Costs

Minimize capital and ongoing expenses:

- No hardware, software, consultants or training to spend money on
- Web-based control panel promotes customer self-administration
- Support processes and tools minimize your support time

Eliminate Risk

- Leverage a proven infrastructure with a 100-percent uptime SLA in use by hundreds of partners

Generate Revenue Today

- Fully automated system allows you to become a partner in under 30 minutes

Key Features:

Full Private-labeling Capability — The control panel displays your branding and your domain URLs, e-mail addresses and phone numbers.

Web-based Service — Our XML-based web services allow deep provisioning and billing integration with your control panel.

Web-based Control Panel — Minimize your support costs by granting customers access to sign up and administer their own accounts. Or, handle the administration yourself to further lighten their burden.

Free Outlook 2007/Entourage 2008 — Your customers get added value while you retain control of your relationship.

About Ingram Micro Seismic

Seismic is an exclusive Ingram Micro managed-services portfolio that helps VARs quickly and easily leverage and deploy a rich portfolio of services, enabling them to manage technical labor resources more efficiently, build and sustain recurring-service revenue streams, improve service levels and customer satisfaction and increase profitability.
