

# WHAT'S NEW @ IMOnsite

## Find the VTN Member You're Looking For New GEOMATCH Search Filter Makes It Easy

### You Asked for It

VTN members asked for it and Ingram Micro responded. Now you can search for a VTN partner using the GEOMATCH search filter at IMOnsite.

### What It Does

GEOMATCH helps you locate a VTN partner close to your end-client's location with the right service capabilities and best satisfaction rating. You can customize a search by chapter, range and specific service capabilities, and sort results by any column heading.

### How to Use GEOMATCH

Go to IMOnsite and log in. Once you're there, select GEOMATCH and then search by VTN chapter or zip code.

Users will specify United States or Canada before choosing a VTN chapter from a drop-down menu.

If you're not certain which chapter will cover a specific zip or postal code, multiple chapters may be selected and the filter will include members who fall within the specific radius search criteria.
