

Online Backup and Restore, Powered by Vaultlogix

Key Benefits:

- **Profitability** — Create recurring revenue streams that offer a high-margin service at an affordable cost.
- **Ease of deployment** — Automate client installations across all leading operating systems and network configurations.
- **Centralized control** — View backup sets from one interface that integrates with leading remote monitoring and management (RMM) services, including Ingram Micro Seismic RMM.
- **Scalability** — Enable bandwidth and storage space conservation, so growing storage requirements can be met affordably.
- **High demand** — Offer an affordable solution to the universal need for secure, cost-effective data storage and rapid retrieval.

Key Features:

- Centralized, automated backup of PCs, file servers and application/database servers
- Immediate recovery process for quick online data restoration
- Agentless backup software, for easy installations
- Common elimination and compression to ensure bandwidth and storage requirements are minimized
- Open management that enables backup of almost any file
- Securely transmitted data at encryption levels exceeding standard government and banking requirements
