

Professional IT Labor Services | On-site Professional Services

Key benefits:

- Extend your geographic reach and offer technologies outside your core competency
- Increase revenue and margin opportunities
- Mitigate costs and risks — no need to invest in resources, training and infrastructure
- Explore and test new market opportunities
- Offer end-to-end solutions in a trusted and secure environment

Expand Your Technical and Geographic Bench, Leveraging the IMSN

Any U.S. Ingram Micro solution provider can leverage the IMSN network to deliver multi-site, level I-IV service delivery. All transactions are performed in a secured, non-compete environment, where the service is delivered under your company name. The IMSN is a network of highly technical service providers who retain the certified engineers you need to fulfill RFPs for your end clients. Capture these bids by leveraging the IMSN.
