New Product Announcement

Network Device Management Options

include ISP management for Global NOC

New! Remote Network Device Management – Optional Service Offerings for Routers, Firewalls and Switches

Product Details

The Seismic Global NOC now offers network device management for routers, firewalls and switches as an optional service to Platinum and Platinum Plus Global NOC plans. The Premium package offers complete monitoring and proactive management of routers and firewall devices. The Comprehensive package adds full remediation support of all devices to the Premium Package. **Both packages include ISP vendor management (escalation to ISP).** The Switch package is designed for switches only.

Premium Package for routers and firewalls:

- Monitoring and alerting for SNMP enabled network devices
- **ISP vendor management**
- Proactive checks on network devices
- Asset inventory of network devices
- Full access to private labeled Partner Portal
- Access to reports

IM SKU: BU5647 U.S. MSP Price: \$ 29.00/device/month Canadian MSP Price: \$34.80/device/month
