- Outbound message filtering
- Fail-safe disaster recovery

#### Web Defense

- Spyware blocking
- Antivirus defense
- Antiphishing protection
- Advanced URL filtering
- Safe search security

## E-MAIL AND WEB DEFENSE

### ADD A CRUCIAL IT SERVICE TO YOUR MANAGED-SERVICES BUSINESS

Ingram Micro Seismic E-mail and Web Defense offers you an affordable way to add leading e-mail and web protection services to your line card. These crucial services can be deployed immediately to act as the first line of defense against online attacks aimed at your customers' networks. There's no need for additional resources or infrastructure; as a result, you'll garner additional recurring revenue and profit streams.

### Because Security Is Imperative for Every Business

The quantity and sophistication of e-mail and web threats continue to escalate at an alarming rate. Smart businesses are aware of this trend but often lack the IT resources necessary to effectively defend themselves from viruses, worms and spam. You can provide their solution. Seismic E-mail and Web Defense services respond within minutes to new and emerging threats, so attacks can be prevented before they cause irreparable damage. Because the solution operates on the network perimeter, no migration or integration is necessary; the activation process is simple.

### Your Customers Will Thank You

You can help your customers address both their business and technology concerns by implementing IT security measures that prevent spam and detect malicious attacks. Present a profitable service that can:

- Reduce legal liabilities
- Increase employee productivity
- Increase network capacity by limiting unauthorized, bandwidth-intensive downloads
- Limit corporate liability due to employee access to inappropriate content by forcing safe internet searches

GROWTH INSPIRED — A Bold Vision in Services
