

Live Instructors.

Real Labs.

Travel Optional.

IN A CLASS BY ITSELF

Ingram Micro provides affordable training from VPN Dynamics, a wholly owned subsidiary.

VPN Dynamics specializes in award-winning classroom and Live Online technology to

provide solutions training to IT resellers and end-user technical staff.

With Live Online training, companies can enjoy the benefits of instructor-led classes without the downtime, delays and expense of travel.

Unmatched Expertise

VPN Dynamics delivers vendor-authorized technology-solution training based in real-world experience that's so highly regarded our vendors send their employees to us for training on their software and applications.

Class Details

We provide quality training from leading technology vendors, including Check Point, Citrix Systems, Juniper Networks, Meru Networks, SonicWALL, VMware and Websense.

To enhance the learning experience, we limit class size to allow for more personal instruction.

All classes are live and taught by knowledgeable instructors with practical, real-world network solutions experience.

Classes can be conducted in our physical classroom setting, via Live Online or at your site. Custom classes are available.

The Live Online Difference

While e-learning usually comprises a self-paced web-training module with no live instructor, Live Online training from VPN Dynamics uses live instructors to facilitate greater interaction between students and instructor. Instructors can view, troubleshoot, and grade lab work in real time.

Our Live Online classes employ online meeting technology, so students can see presentation materials as the instructor lectures. Students remotely log into the lab equipment, and students are able to communicate live with the instructor and one another using a toll-free phone bridge.

All VPN Dynamics Live Online courses come with a bonus 24 hours of sandbox time after the class ends.

Combine VPN Dynamics with Ingram Micro IT Staffing

Hire through Ingram Micro IT Staffing and receive 50 percent off the training price for any employee.
