

YES Flexible Payment Solutions

Hardware-as-a-Service

Hardware-as-a-Service allows you to bundle all project work, hardware and managed services into YOUR agreement with the customer.

Benefits of Hardware-as-a-Service for you:

- Your customer only has one agreement.
- You control all invoicing and collections.
- Provide an all-inclusive technology solution.
- You don't have to introduce a third party to your clients.

How it works:

1

Request credit approval for the amount of your project* for a customer.

2

Once BOM is finalized, FPS will provide an addendum to your master lease.

3

FPS will send a monthly invoice for the amount due.

4

As you add clients to your program, FPS will add those to the invoice we send you.

*Projects may include SKUed items for hardware and software.

For more information

Call (844) 360-3899 or email sales@ingrammicrofps.com, and a dedicated leasing specialist will provide you with a customized leasing proposal.
